Verify the record number at courses.addp2p.com/development-road/independence/index.html?view=verify

An issued record preserves submitted information. It is not a grade or proof of comprehension.

What do you understand about the work and finish line?

Thus far, we've walked through a step-by-step lesson from what we must cultivate non-technically as developers--such as a growth mindset--to how to navigate Unity/the IDE we'll be working with.

What will you contribute? Name a task or useful capability.

As a solo worker, I'll contribute everything: game idea, creating project file, logging work, importing assets, and keeping a personal GitHub repository for Week 12.

What needs research, support or practice?

I still need to develop an intuition with Unity. In my first attempt, I deleted most assets since it overloaded GitHub. Often times, it feels like I'm doing things wrong, so I need to start checking in with others regardless of working solo to make sure I'm on track.

Your available work times and preferred contact method: Discord, email, text, classroom or other. Keep private addresses/numbers outside public exports.

Preferred contact: Discord

List your project tools and why you need them.

- Unity: building my game
- Git commands: track changes quickly
- GitHub: keep repository

Required: name the AI you will use, its project task and how you will verify its output. Use course-provided/shared or approved local access if needed; no personal or paid AI account is required.

AI: Gemini

Task: Help me work through ambiguity and explain simple tools/functions necessary to my game.

Verification: Verifying through console output error messages & potentially running through another AI (like ChatGPT).

ai

Name

Gemini

task

Help me work through ambiguity and explain simple tools/functions necessary to my game.

verify

Verifying through console output error messages & potentially running through another AI (like ChatGPT).
