CS110 / INDEPENDENCE ROAD

reportB / Genavive Ramirez

Issued: Nov 12, 2026, 2:20 PM Pacific

Record: FORM-65FACC90B463475F9A012D43

Personal public verification code: VIEW-DBB8B2953E97A372233B6EA4

Include your own public code with every assignment, even in a team folder. Never submit your private recovery key.

SHA-256: 2f3b403f398816d27bc355fce7255af5b844040cb0886f2ff3aa81231f7b4079

Verify the record number at courses.addp2p.com/development-road/independence/index.html?view=verify

An issued record preserves submitted information. It is not a grade or proof of comprehension.

What did you personally execute? Connect completed tasks to files/commits.

Personally executed:

- Created and kept live work log (https://github.com/genavivermz/CS110-Week12/blob/main/MyGameLog.txt)
- Created Unity project
- Followed Videos 1-6 Unity & setup tutorials
- Developed own cubes/project additions (https://github.com/genavivermz/CS110-Week12/blob/main/12B-Unity-Evidence.png)

Record setup/import checks, project opens/runs, player configuration/result, and one failure fix retest. Separate observed results from predictions.

Setup checks:

- Cubes show up
- Cubes are colored
- Folders & files are properly organized & named
- Project opens
- Project runs --> Hit Start Client --> Didn't load --> Hit Host --> Player loaded and ran --> Project runs + Solved (https://github.com/genavivermz/CS110-Week12/blob/main/12B-Project-Running.png)

Personal GitHub URL/commit, team link if used, project/source paths, PDFs, boards/images, credits and reproduction instructions.

No team link, solo

Source paths: Said too big to put in my ZIP file, currently correcting --> Screenshotted and placed in Images/

Images: https://github.com/genavivermz/CS110-Week12/tree/main/Images

Credits: @mstalbert on YT; Professor Stalbert's project folder setup

Compare the result with the mission. What did you verify, what remains, and what should the team do next?

Mission:

To set up my game properly

Result:

Ended up following videos 1-6, adding my own edits as well to test skills/knowledge

Verified:

Game runs and is playable

Next step:

CS110 / INDEPENDENCE ROAD

Actually getting into development of the game idea; started it off with some blocks as placeholders for actual objects part of my game idea, but didn't hone too intricately, so that is the next step.

Issued team form

FORM-B1D985127B5CD615F0FA3AAF

Whiteboard

1. Followed videos 1-6 from Prof. Stalbert
2. Downloaded templates from Unity
3. Added files and folders provided by Prof. Stalbert
4. Added cubes and colored them
5. Verified project ran, it didn't, fixed it and verified as successful.l

true

Execution / result

What I did:

- Created folder structure, downloaded third person gameplay Unity template, added cube, colored cubes blue, duplicated 2 cubes.

Evidence:

https://github.com/genavivermz/CS110-Week12/blob/main/12B-Unity-Evidence.png

Result:

Oriented objects to my own desire.

reviewedPlan

mission

Solo decision: BedWars-esque story

Goal: Destroy other teams' beds

framework

ADD: Keeping task progress bars encourages participation and elicits gratification, which is what's guiding my game.

pipeline

CS110 / INDEPENDENCE ROAD

Crete one-page design

Outline all player functions/keys

Axe beds for materials & tasks

Level up, gain XP, & obtain currency

Test w/ Game Viewer owner Genavive 2026-11-12T12:45 to 2026-11-13T19:42 Pacific

1. Creation of a document to keep direction in mind (one-page design).

2. Every action needs to correspond to a key -->

3. Actions need to be articulated to axe beds and check off tasks.

4. Players level up, gain XP, and gain in-game currency for doing such actions.

5. How I will test each action: Game Viewer

(ALL DONE SOLO)

tech

Engine: Unity

Language: C#

Package & Assets: 3D Models + something for axe/beds?

Why I chose them: Familiarity with Unity and C# + models and tools are the only in-game objects I'll have.

Who checks them: Genavive (solo)

Time code

f(x) Functions

Function | Inputs result | When called

HitBed() | damage | Input.GetMouseButtonDown(0)

communication

Team check-ins

Description / contact / owner | When Pacific | Agreed

Working solo | 2026-11-12T19:49 | [x]

reuse

In later story production, the setup for the 3D model imports can be reused, as that's something non-specific to my game this week.

boardNotes

~ Huddle board ~

Doing this solo, so every decision made kept only my availability and capabilities in mind.

Whiteboard

1. Using C# as language

2. Working in Unity

3. Using Gemini and ChatGPT to enhance game development/guidance -->

--> Working solo.
