CS110 / INDEPENDENCE ROAD

reportA / Genavive Ramirez

Issued: Nov 12, 2026, 2:36 PM Pacific

Record: FORM-EFDE55F7B07397E8AA99656D

Personal public verification code: VIEW-DBB8B2953E97A372233B6EA4

Include your own public code with every assignment, even in a team folder. Never submit your private recovery key.

SHA-256: 86b1592b4cbe3a1ea95a9d4c1bc97ce5646deb2039f2ef0ee8569aaca8685c6a

Verify the record number at courses.addp2p.com/development-road/independence/index.html?view=verify

An issued record preserves submitted information. It is not a grade or proof of comprehension.

What did you complete today? Explain your personal contribution and the plan ready for Day B.

Completed:

- Full articulation of 12B work ahead
- Reviewed all of the prep-work videos
- Assigned work, or more so articulated it as I'm working solo

Personal GitHub checkpoint/commit and paths to PDFs, notes, boards, task list and team link (if teamed).

GitHub Checkpoint:

https://github.com/genavivermz/CS110-Week12

Your next task, deadline and blocker/recovery plan.

Next task:

- Go through each video 1-6 off @mstalbert on YouTube

Deadline:

- Thursday, Nov 12

Blocker:

- Timed work

Recovery plan:

- Use private recovery key

Completed

true

Execution / result

What I did:

- Created folder structure, downloaded third person gameplay Unity template, added cube, colored cubes blue, duplicated 2 cubes.

Evidence:

https://github.com/genavivermz/CS110-Week12/blob/main/12B-Unity-Evidence.png

Result:

Oriented objects to my own desire.

reviewedPlan

mission

Solo decision: BedWars-esque story

Goal: Destroy other teams' beds

framework

ADD: Keeping task progress bars encourages participation and elicits gratification, which is what's guiding my game.

pipeline

Crete one-page design

CS110 / INDEPENDENCE ROAD

Outline all player functions/keys

Axe beds for materials & tasks

Level up, gain XP, & obtain currency

Test w/ Game Viewer owner Genavive 2026-11-12T12:45 to 2026-11-13T19:42 Pacific

1. Creation of a document to keep direction in mind (one-page design).

2. Every action needs to correspond to a key -->

3. Actions need to be articulated to axe beds and check off tasks.

4. Players level up, gain XP, and gain in-game currency for doing such actions.

5. How I will test each action: Game Viewer

(ALL DONE SOLO)

tech

Engine: Unity

Language: C#

Package & Assets: 3D Models + something for axe/beds?

Why I chose them: Familiarity with Unity and C# + models and tools are the only in-game objects I'll have.

Who checks them: Genavive (solo)

Time code

f(x) Functions

Function | Inputs result | When called

HitBed() | damage | Input.GetMouseButtonDown(0)

communication

Team check-ins

Description / contact / owner | When Pacific | Agreed

Working solo | 2026-11-12T19:49 | [x]

reuse

In later story production, the setup for the 3D model imports can be reused, as that's something non-specific to my game this week.

boardNotes

~ Huddle board ~

Doing this solo, so every decision made kept only my availability and capabilities in mind.

Whiteboard

1. Using C# as language

2. Working in Unity

3. Using Gemini and ChatGPT to enhance game development/guidance -->

--> Working solo.
